

# WATER WAVES

## **Nestle/Poland Spring doesn't understand the meaning of the word "NO"!**

If you want to know what kind of company, (or neighbor), Nestle/Poland Spring is, just look at their actions.

When dealing with town issues like the Fryeburg Planning Board's decision to deny Poland Spring a permit for a truck loading facility in a Rural Residential Zone, Poland Spring was given a clear "NO" by the town three separate times. Mark Dubois, resource manager from Poland Spring, stated they will now be appealing the decision once again, suing the town of Fryeburg in Superior Court. Will they just keep appealing and suing Fryeburg until they ultimately get what they want? Will the grab for spring-water ever stop?

Is this part of Poland Springs' much publicized, "***Good Neighbor Policy***"?

***"What does it mean to be a good neighbor? It means saying what we mean and doing what we say. These are our commitments and you can hold us to them. To us, this is what it means to be a good neighbor."***

*(excerpt from Poland Springs' website)*

**Fryeburg has heard what Poland Spring has been saying for many years. Now it is time for Poland Spring to listen, and hear that the people of Fryeburg have said no.  
The people of Fryeburg mean what **THEY** say too.**
